

THOR GUARD TG360 IT INFORMATION

The TG360 Lightning Prediction System requires a PC running the ThorServer Software with a connection to the web for support as well as to supply the data for ThorMobile/ThorTV for customer viewing away from the system. ThorServer Service software is installed on a PC with a Windows Operating System currently supported by Microsoft. The connections needed for this machine are...

ThorServer
thormobile.net
UDP Port 3900

ScreenConnect
<https://thorguard.screenconnect.com/>
relay://instance-j2n0v8-relay.screenconnect.com:443/
Port 443

More information can be found in the TG360 User Manual
