

TESTIMONIALS

I have been using Thor Guard at Erin Hills since 2006. The system has proven to be very valuable and extremely reliable. The system makes the important weather decisions for you and removes any guesswork and subjective decisions that you might make regarding storms. The support team is excellent and maintenance requests are handled almost immediately.

As a Tampa Bay school district, we are accustomed to severe weather on a regular basis and lightning awareness is an important part of our overall school health and safety plan. We know that we can count on Thorguard's dependability and customer service to ensure that we are always covered during all types of weather. Pinellas County Schools is proud to partner with Thorguard to help keep our students and staff safe.

I can't imagine overseeing the daily safety and well being of our members, their families, and guests, without having Thor Guard as our early lightning warning prediction partner. I have seen lives saved and changed because of this cutting edge technology.

Thank you Bob Dugan and ThorGuard!

We've been with ThorGuard for over a decade, and upgraded to 360 five years ago. The functionality has vastly improved the benefits we receive from the system. In addition to safety notifications for our membership and the helpful app, the data collected by our weather station is critical to help our Superintendent track precipitation and ET rates.

In my 3 decades of working in the Caribbean and Central America, there is not a better system to protect your golfers/members/guests from a possible lightning strike. Thorguard gives people time to get to a safe area before something bad happens to someone. That is why we chose Thorguard. We would not be safe with any other system. Thank you Thorguard.

Heath Henrich, PGA
General Manager
Club de Golf de Panama

We have enjoyed our Thor Guard system for many years. We have a monitor up in the golf shop and the Thor Guard color system makes it easy for our staff to show our customers when dangerous weather is getting close or when it becomes all clear. It takes out the guess work, which we all appreciate.

General Manager
Rush Creek Golf Club

FAZENDA DA GRAMA

The Thor Guard Lightning System is a must-have for golf courses and tournament operations, providing accurate lightning detection to keep players and staff safe during storms. With real-time alerts, it helps ensure timely decisions. The company's customer service is top-notch—always responsive, friendly, and ready to assist with any needs!

Kevin Bulman, PGA
Head Golf Professional
Fazenda da Grama

Brazil is the country with the most lightning strikes in the world, as it is the largest tropical country on the planet, with a hot and rainy climate. The annual average is 77.8 million lightning strikes, but in the last two years 280 million lightning strikes were recorded. Lightning strikes cause an average of 110 deaths per year in Brazil. Therefore, the use of the Thor Guard Lightning System is essential to ensure the safety of the golf course and other areas of the condominium such as the beach, equestrian, lakes, etc. Despite the distance from ThorGuard's headquarters, we are very happy with the quality of the company's equipment and remote support.

Sylvio Telles Siqueira
Superintendent / Agronomist
Fazenda de Grama

Thor Guard is an indispensable tool for school safety and recreational outdoor events. We utilize Thor Guard daily to ensure the safety of our students and staff in the face of unpredictable weather conditions.

Our Safe Schools Officer, Facilities Manager, and I rely heavily on Thor Guard's advanced weather monitoring capabilities. The system functions much like having a dedicated staff member responsible for monitoring and safeguarding against weather-related risks. The ability to receive timely and accurate weather alerts is crucial for our operations, particularly given the frequent and spontaneous weather changes in Southwest Florida.

Bob Dugan, President of Thor Guard, has been exceptionally supportive throughout our experience. His assistance with installation, training, and ongoing troubleshooting has been invaluable. His commitment to customer service and technical support has ensured that we maximize the effectiveness of our Thor Guard system.

I cannot overstate the importance of Thor Guard in maintaining a safe environment for our school and outdoor activities.
